### Monitors for Single User

Miracube allows you to understand better and decide quicker

| Model        | G170S         | C190S         | G240M         |  |
|--------------|---------------|---------------|---------------|--|
| Size         | 17"           | 19"           | 24"           |  |
| Stereo type  | Glasses       | Non Glasses   | Glasses       |  |
| Resolution   | 1280*1024     | 1280*1024     | 1920*1200     |  |
| Input Signal | VGA/DVI       | VGA/DVI       | VGA/DVI       |  |
| Dimension    | 380x390x190mm | 445x445x250mm | 575x455x170mm |  |

### Monitors for Multiple Users

Miracube allows you to experience a new display generation with large viewing angle

| Model        | G320S         | G460X                |
|--------------|---------------|----------------------|
| Size         | 32"           | 46"                  |
| Stereo type  | Glasses       | Glasses              |
| Resolution   | 1360*768      | 1920*1080            |
| Input Signal | VGA/DVI       | VGA/DVI/HD component |
| Dimension    | 790x550x170mm | 1100x710x250mm       |

# 3D VR System

Visualization + Simulation + Interpretation

#### 3D Recording - made easy

### Miracube 3D Pro Stereographic System

With the Miracube 3D Pro Stereographic System Pavonine korea offers for the first time. A complete system for professional 3D filmmaking - in HD resolution. The system consists of Stereographic mount, HD-synchronizer, 3D LCD Viewfinder, HD 3D LCD Monitor and HD storage PC.

Stereographic Mount

3D Viewfinder

LANC Controller

**HD-Synchronizer** 

HD 3D Monitor

HD Storage PC

| Stereographic Mount | Mounts a pair of professional cameras Motorized controller for convergence and separation Can closely adjust horizontality of a pair of cameras Equipped with control device of optical axis Including stereo LANC controller   |  |  |  |
|---------------------|---|--|--|--|
| HD-Synchronizer     | HD-SDI (SMPTE 292M/259M) input(2ch) / output<br>COMPONENT (HD analog 1080i, 720p, 480i) input(2ch) / output<br>HD-HDMI (HD Digital 1080i, 720p) output<br>Monitoring HDMI output<br>Field sequential, Side fields stereo format |  |  |  |
| 3D Viewfinder       | 7" or 10.4" - Non Glasses type<br>2D and 3D switchable LCD Viewfinder<br>HDMI (SVGA Digital RGB) input<br>Field sequential, Side fields stereo format   |  |  |  |
| HD Storage Server   | HD-SDI or HD-HDMI Capture<br>JPEG2000 or No-Compression   |  |  |  |
| LANC Controller     | Power, Zoom-in / Out, Rec./Stop, Function   |  |  |  |
| Optional            | A fair of professional cameras, Video Head / Tripod<br>Windows or Max OS X and Software   |  |  |  |

#### Stereoscopic 3D Display Lineup

A new stereoscopic 3D solution for professional users

|                             | Size | Stereo type | Viewer | Resolution  | VGA/DVI    | HD Component              |  |  |
|-----------------------------|------|-------------|--------|-------------|------------|---------------------------|--|--|
|                             | 17"  | Glasses     | Single | 1280 * 1024 | •          | 0                         |  |  |
| 7                           | 19"  | Non Glasses | Single | 1280 * 1024 | •          | 0                         |  |  |
|                             | 24"  | Glasses     | Single | 1920 * 1200 | •          | 0                         |  |  |
|                             | 32"  | Glasses     | Multi  | 1360 * 768  | •          | 0                         |  |  |
|                             | 46"  | Glasses     | Multi  | 1920 * 1080 | •          | •                         |  |  |
|                             |      |             |        |             | • basic fu | ● basic function ○ option |  |  |
| 17", 19", 24" - Single User |      |             |        |             |            |                           |  |  |

32", 46" - Multiple Users

#### Stereoscopic 3D Display Features

stereoscopic 3d without glasses

 switchable between 2d and 3d

internal 3d formatter 3d easy to use

high resolution and wide viewing angles
